This presentation contains certain statements that may be considered “forward-looking statements” with respect to Kutcho Copper Corp. (“Kutcho Copper” or the “Company”) within the meaning of applicable securities laws, including but not limited to statements with respect to Kutcho Copper’s future operational plans, estimated mineral resources and mineral reserves, the timing and amount of estimated permitting, development and production, costs of permitting, development and production, capital expenditures, commodity price assumptions, the Company’s ability to successfully obtain all regulatory approvals and permits to commence and conduct proposed operations, environmental risks, title challenges, and receipt of payments under the Precious Metals Purchase Agreement.

Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words “expects”, “plans”, “anticipates”, “believes”, “intends”, “estimates”, “projects”, “potential” and similar expressions, or that events or conditions “will”, “would”, “may”, “could” or “should” occur. Although Kutcho Copper believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance, are subject to risks and uncertainties, and actual results or realities may differ materially from those contained in the forward-looking statements. Such material risks and uncertainties include, but are not limited to the Company’s ability to raise sufficient capital to fund its obligations under various contractual arrangements or under its property agreements going forward, to maintain its mineral tenures and concessions in good standing, to explore and develop the Kutcho project and for general working capital purposes, changes in economic conditions or financial markets, the ability of the Company to achieve obligations under the Precious Metals Purchase Agreement, the inherent hazards associated with mineral exploration and mining operations, future prices of copper and other metals, changes in general economic conditions, accuracy of mineral resource and reserve estimates, environmental challenges and risks, the ability of Kutcho Copper to obtain the necessary permits and consents required to explore, drill and develop the Kutcho project and if obtained, to obtain such permits and consents in a timely fashion relative to Kutcho Copper’s plans and business objectives for the projects, the general ability of Kutcho Copper to monetize its mineral resources, changes in environmental and other laws or regulations that could have an impact on the Company’s operations, compliance with environmental laws and regulations, aboriginal title claims and rights to consultation and accommodation, dependence on key management personnel and general competition in the mining industry.

Although the Company has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in the forward-looking statements or information, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. Also, many of such factors are beyond the control of the Company. Accordingly, readers should not place undue reliance on forward-looking statements or information. The forward-looking information is made as of the date of this presentation (or in the case of information contained in a document incorporated by reference herein, as of the date of such document), and the Company assumes no obligation to publicly update or revise such forward-looking information. Forward-looking statements are based on the reasonable beliefs, estimates and opinions of Kutcho Copper’s management on the date the statements are made. However, except as required by law, Kutcho Copper undertakes no obligation to update these forward-looking statements in the event that management’s beliefs, estimates or opinions, or other factors, should change.

The forward-looking information contained herein is expressly qualified in its entirety by this cautionary statement.

Technical aspects of this presentation have been reviewed and approved by Rory Kutluoglu, B.Sc., P.Geo., a Qualified Person, as that term is defined under National Instrument 43-101.
Kutcho Copper has a clear path to develop its 100% owned high grade copper-zinc project

**2017 Probable Reserve**
10.4 Mt at 2.01% Cu & 2.92% CuEq

**Wheaton Precious Metals**
supports Kutcho with financing package of C$100 million

**Updated Resource Estimate (Sept 2020)**
Measured & Indicated: 18.6 Mt at 2.58% CuEq
Inferred: 13.2 Mt at 1.59% CuEq

**Wheaton Precious Metals** supports Kutcho with financing package of C$100 million

**Metallurgy Results**
Significant improvements in recoveries of up to
92.3% Cu & 84.2% Zn at Main lens
94.5% Cu & 89.3% Zn at Esso lens

**Feasibility Study**
to follow in Q2 2021

---

1 Copper equivalent grade (CuEq%) calculated as copper equivalent recovered and based on commodity prices of US $2.75/lb Cu, US $1.10/lb Zn, US $17.00/oz Ag and US $1,250/oz Au, and metal recoveries of 84.7% Cu, 75.7% Zn, 48.0% Ag and 41.2% Au

2 See page titled “Technical Information – Compliance with NI 43-101”

3 The base case cut-off grade is 1.0% CuEq for the Main and Sumac deposits based on the formula: CuEq = (Cu% x 0.874) + (Zn% x 0.245) + (Ag g/t x 0.257) + (Au g/t x 0.0053). The base case cut-off grade for Esso is 0.9% CuEq based on the formula: CuEq = (Cu% x 0.945) + (Zn% x 0.343) + (Ag g/t x 0.284) + (Au g/t x 0.0064). Mineral resources do not have demonstrated economic viability. Metal prices: Copper US $3.25/lb, Zinc US $1.25/lb, Gold US $1550/oz, Silver US $20.00/oz. Projected operating costs: Mining US $33.75/t, Processing US $17.91/t, G&A US $10.13/t. Process recoveries Main and Sumac: Copper 87.4%, Zinc 63.8%, Gold 36.9%, Silver 59.0%. Process recoveries Esso: Copper 94.5%, Zinc 89.3%, Gold 40.8%, Silver 71.2%.

## Board of Directors & Advisory Board

### Vince Sorace
President & CEO, Director
- 25 years experience in capital markets
- Raised over $250M in equity & debt financings
- Prior roles include Founder, President & CEO of various private and public resource companies

### Stephen Quin
Director
- 30 years experience in mining & corporate affairs
- Formerly President, CEO & Director of Midas Gold, President & CEO of Sherwood Copper and President & COO of Capstone Mining

### Bill Bennett
Director
- Former BC gov't MLA for 16 years
- Named BC Mines Minister 3 times
- Led improvements to BC Ministry of Energy & Mines permitting process; helped launch BC’s First Nations mine revenue sharing program

### Jay Sujir
Director
- Partner, Farris, Vaughan, Wills & Murphy, LLP
- Current director of several junior explorer and mining companies

### Peter Meredith
Advisor
- Prior CFO & Chairman of Ivanhoe Mines
- Holds CA designation

### Stuart Angus
Advisor
- Former head of mining at Fasken Martineau
- Former Chairman BC Sugar Refinery

### Cherie Leeden
Advisor
- Resource Executive and geologist
- Global market experience across all commodities
- CEO Gold Bull Resources Corp; Director Hog Ranch Minerals
Market momentum

"A deficit in the copper market is set to deepen over the next several years as supply of the widely used metal struggles to keep up with strong demand from the power and construction sectors, compounded by the proliferation of electric vehicles."

S&P Global Market Intelligence
Kutcho Copper offers a strong share structure

**Capital structure**
- Shares issued: 88,100,026
- Stock options: 8,057,000
- Warrants: 17,549,425

**Major shareholders**
- Capstone Mining: 11%
- Wheaton Precious Metals: 9%
- Management: 5%
- Retail + other: 75%
- Capstone: 11%
- Wheaton: 9%
Wheaton financing provides over $100m

Precious metals stream

- **US$7 million** provided to fund the feasibility study
- **US$58 million** for development capital
- Up to an additional **US$20 million** towards development capital if Kutcho expands to a 4,500 tpd operation
- Ongoing cash payment equal to **20%** of the applicable spot price

Stream will decrease to 66.67% of Ag and Au production for the LOM after delivery of 5.6Moz of Ag and 51koz of Au

Only **8%** of project revenue is connected to the stream

Term debt loan

- **C$20 million** convertible term debt loan

Equity investment

- Wheaton invested **C$4 million** through a private placement in December 2017

Metal % contribution to revenue

- **61% Cu**
- **31% Zn**
- **5% Ag**
- **3% Au**
A development-friendly region with a number of major projects in various phases of development & construction, with local skilled workforce.
Kutcho is an accessible project with on-site and nearby infrastructure situated within subtle terrain.
The Kutcho project covers 90% of the prospective Kutcho formation rocks.

The prospective volcanic rocks are folded, repeating the mineralized horizon threefold on the project, including the deposit.

The massive sulphide deposits are aligned East-West and plunge at 15° towards the West.
Kutcho updated resources by category
The estimates in the table form coherent bodies that are considered amenable to underground extraction methods based on the following parameters: Metal Prices: Copper US $3.25/lb, Zinc US $1.25/lb, Gold US $1550/oz, Silver US $20.00/oz. Projected operating costs: Mining US $33.75/t, Processing US $17.91/t, G&A US $10.13/t. Process recoveries Main and Sumac: Copper 87.4%, Zinc 63.8%, Gold 36.9%, Silver 59.0%. Process recoveries Esso: Copper 94.5%, Zinc 89.3%, Gold 40.8%, Silver 71.2%.

The base case cut-off grade is 1.0% CuEq for the Main and Sumac deposits based on the formula: CuEq = (Cu% x 0.874) + (Zn% x 0.245) + (Au g/t x 0.257) + (Ag g/t x 0.0053). The base case cut-off grade for Esso is 0.9%CuEq based on the formula: CuEq = (Cu% x 0.945) + (Zn% x 0.343) + (Au g/t x 0.284) + (Ag g/t x 0.0064).

The effective date of the estimate of mineral resources is September 8, 2020.

Mineral resources do not have demonstrated economic viability.

The estimate of mineral resources was calculated based on the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM"), CIM Standards on Mineral Resources and Reserves, Definitions and Guidelines prepared by the CIM Standing Committee on Reserve Definitions. It is reasonably expected that the majority of Inferred mineral resources could be upgraded to Indicated, or Measured, mineral resources with continued exploration. Kutcho Copper is not aware of any legal, political, environmental, or other risks that could materially affect the potential development of the mineral resources.
2017 PFS Economics

- After tax NPV of C$265 million and IRR of 27.6%
- After tax cumulative undiscounted Cash Flow of C$550 million
- Initial capex of C$221 million
- PFS “base case” metal price assumptions of US$2.75/lb Cu & US$1.10/lb Zn

Production highlights (Based on 2017 PFS)

- 12 years Mine life
- 2,500 tpd Production rate
- 84.7% Cu recovery
- 75.7% Zn recovery
- 378 Mlbs LOM payable Cu production
- 473 Mlbs LOM payable ZN production
- C$0.97/lb Cu AISC (net of by products)

Preliminary Investigation of cyanide leach of the cleaner tailing's streams from both Main and Esso

K80: 25µm regrind of the Main pyrite concentrate only

Significant incremental recovery gains for Cu, Ag and Au
Environmental permitting is subject to only the provincial review process

The Company has filed the Project Description in September 2019 & initiated the BC Environmental Assessment (EA)

Permits will be issued after completion of EA process & issuance of EA certificate

Recent baseline studies completed between 2006-2015 were re-established in 2018 to support FS project design
First Nations – Tahltan & Kaska Dena

- Kutcho Copper executed an Exploration Agreement with Tahltan Central Government in April 2018 and renewed their Communications Agreement in January 2020

- Exploration Agreement signed with Kaska Dena Nation in February 2019

- Continued engagement with First Nations is ongoing

- Project Description was a collaborative approach with both Nations
Kutcho Copper’s work program

- Submission of project description in Q3 2019 initiated BC Environmental Assessment Process (“EA”)
- Delivery of Feasibility Study anticipated Q1-Q2 2021
- Construction decision estimated Q3-Q4 2023

Kutcho also has strong upside potential

Drill target areas

1. **The Main-Sumac Gap**: identifies a 400 m by 380m panel between Main and Sumac that is untested by drilling.

2. **Open Down Dip**: 36% of Main, 50% of Esso and 100% of Sumac remain open down dip and outside of the current resource model.

3. **Esso-West Expansion**: target lies 300 m west of Esso where drilling returned 7.2 m of 2.0% Cu, 5.2% Zn and ~17 g/t Ag in hole E094B3.

4. **FWZ Expansion**: lies beneath Main and is open in all directions. Drill hole E057, on its eastern margin, intersected 1.5 m of 3.54% Cu, 6.94% Zn, 316.9 g/t Ag and 1.47 g/t Au.
There are several under-explored exploration targets

Multiple repeated VMS sulphide horizons are under-explored

No significant exploration conducted on the property since 1990

High priority targets:
1. documented sulphide horizons
2. VTEM conductors
3. strongly altered volcanic rocks
Appendix
Technical information compliance with NI 43-101

The technical information in this presentation (the “Technical Information”) has been approved by Rory Kutluoglu, B.Sc. P.Geo., Vice President of Exploration of Kutcho Copper Corp. and a Qualified Person. For readers to fully understand the information in this presentation, they should read the Pre-Feasibility Study Report entitled “Prefeasibility Study Technical Report on the Kutcho Project, British Columbia” and dated effective June 15, 2017 (“2017 PFS” or the “Technical Report”; available on SEDAR or at www.kutcho.ca) in its entirety, including all qualifications, assumptions and exclusions that relate to the information set out in this presentation that qualifies the Technical Information contained herein. The 2017 PFS is intended to be read as a whole, and sections or summaries should not be read or relied upon out of context. The technical information in the 2017 PFS is subject to the assumptions and qualifications contained therein.

Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource estimates do not account for mineability, selectivity, mining loss and dilution. These mineral resource estimates include inferred mineral resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is also no certainty that these Inferred mineral resources will be converted to the Measured and Indicated categories through further drilling, or into mineral reserves, once economic considerations are applied. The economic analysis contained in this presentation does not include inferred resources. For readers to fully understand the information in this presentation, they should read the news release entitled “Kutcho Copper Expands High-grade Mineral Resources to 17.26 MT of Measured & Indicated at 2.61% CuEq and 10.71MT of Inferred

The Project will be subject to a number of federal, provincial and local laws and regulations and will require permits to conduct its activities. However, Kutcho Copper is not aware of any environmental, permitting, legal or other reasons that would prevent it from advancing the project. The 2017 PFS was compiled by JDS Mining & Energy Inc. which was engaged by Kutcho Copper, to evaluate potential options for the possible development of the Kutcho Project based on information available up to the date of the 2017 PFS. Kirkham Geosystems Ltd. (mineral resources), Allnorth Consultants Limited. (access road), also contributed to the 2017 PFS. Additional details of responsibilities are provided in the Technical Report filed on SEDAR on August 2, 2017.

3. A Probable Mineral Reserve is the economically mineable part of an Indicated Mineral Resource, and in some circumstances a Measured Mineral Resource, demonstrated by at least a Preliminary Feasibility Study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified.
